About GuidelineStat™

GuidelineStat™ is a CME resource dedicated to the needs of busy, practice-based physicians, which will span multiple therapeutic areas.

Each GuidelineStat™ CME activity provides evidence-based guideline content in a variety of formats, developed in conjunction with a primary author, or leading expert for each guideline, including:

- A Slide Presentation, suitable for self-directed learning and teaching
- A Disease State Animation focused on the disease entity and its treatment
- Practical Case Studies exemplifying key teaching points and best-practice guideline recommendations
- Treatment and Diagnostic Algorithms
- An Executive Summary that addresses the practical, need-to-know information from the guideline
- Physician Self-Evaluation
- Patient Education Resources for in-office communications with patients
- A Discussion Forum to promote information exchange between learners and guideline experts
- Breaking News with links to recent publications

Imedex, LLC is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

These activities have been approved for AMA PRA Category 1 Credit™.

GuidelineStat™ – a unique, one-stop, certified resource, delivering “mainstream”, evidence-based clinical practice guideline content through innovative educational formats, developed in conjunction with guideline authors and experts. CME activities include animations, slide presentations, algorithms, and practical case studies.

GUIDELINESTAT™

Providing Summary, Evidence-Based Information

Each **GuidelineStat™** module provides evidence-based guideline content in a variety of formats, developed in conjunction with a primary author, or leading expert for each guideline, including:

- An Executive Summary
- A Slide Presentation
- An Animation, focused on the disease entity and its treatment
- Practical Case Studies
- Treatment and Diagnostic Algorithms
- Physician Self-Evaluation
- Patient Education resources for in-office communications with patients
- A Discussion Forum
- Breaking News

Animation: The Pathophysiology of HR+ Breast Cancer.

Hormone Receptor Positive Breast Cancer
GuidelineStat™ CME Module

Case Study 1:
Adjuvant Therapy
(Postmenopausal Patient)

Case Study 2:
Metastatic Disease
(Premenopausal Patient)

Learning Objectives

After completing this educational activity, the learner should be better able to:

- Explain adjuvant therapy options available for the patient with HR+ breast cancer according to the Practice Guidelines for Breast Cancer
- Differentiate between approved cytotoxic agents and combinations of these agents which have benefits in the adjuvant, metastatic, and relapsed settings in the patient with HR+ breast cancer
- Incorporate new targeted agents and combinations into the therapy algorithm for HR+ breast cancer in various scenarios when appropriate
- Describe current standards and options for the management of metastatic disease in the HR+ patient in the front-line and recurrent disease settings

Expert opinion on evidence-based guidelines; delivering best-practice recommendations through user-friendly, online, case-based CME activities

GUIDELINESTAT™

www.GuidelineStat.com

© 2008 Mechanisms in Medicine Inc. and Imedex, LLC. Developed and published by Mechanisms in Medicine Inc. GuidelineStat™ is a trademark of Mechanisms in Medicine Inc.

GuidelineStat™ is the only Web site of its kind. A guideline-originated CME resource, linked to breaking medical evidence and studies, it is dedicated to the needs of busy, practice-based physicians, spanning multiple therapeutic areas, with educational activities that include guideline-oriented patient cases.

GuidelineStat™ seeks to avoid voluminous text, which may be a barrier to the implementation of and adherence to many published guidelines. Focusing on the specific needs of physicians, which are identified through carefully conducted needs assessments, each **GuidelineStat™** learning module emphasizes the 'need-to-know' information for every-day clinical practice based on a particular guideline.

GuidelineStat™ will be a multi-therapeutic guideline resource, with the goal of hosting more than 60 guideline-based CME modules over the next three years. Through **GuidelineStat™** physicians will be encouraged and ultimately motivated to consult, implement and adhere to guidelines in their day-to-day practice.

www.GuidelineStat.com

Applying Evidence-Based Guidelines to Clinical Practice

Recognizing that every physician has his or her preferred learning style, **GuidelineStat™** learning modules provide a variety of educational formats and features, developed in conjunction with a primary or leading author who contributed to the original published guideline.

Physician-learners will benefit from a variety of educational formats, including:

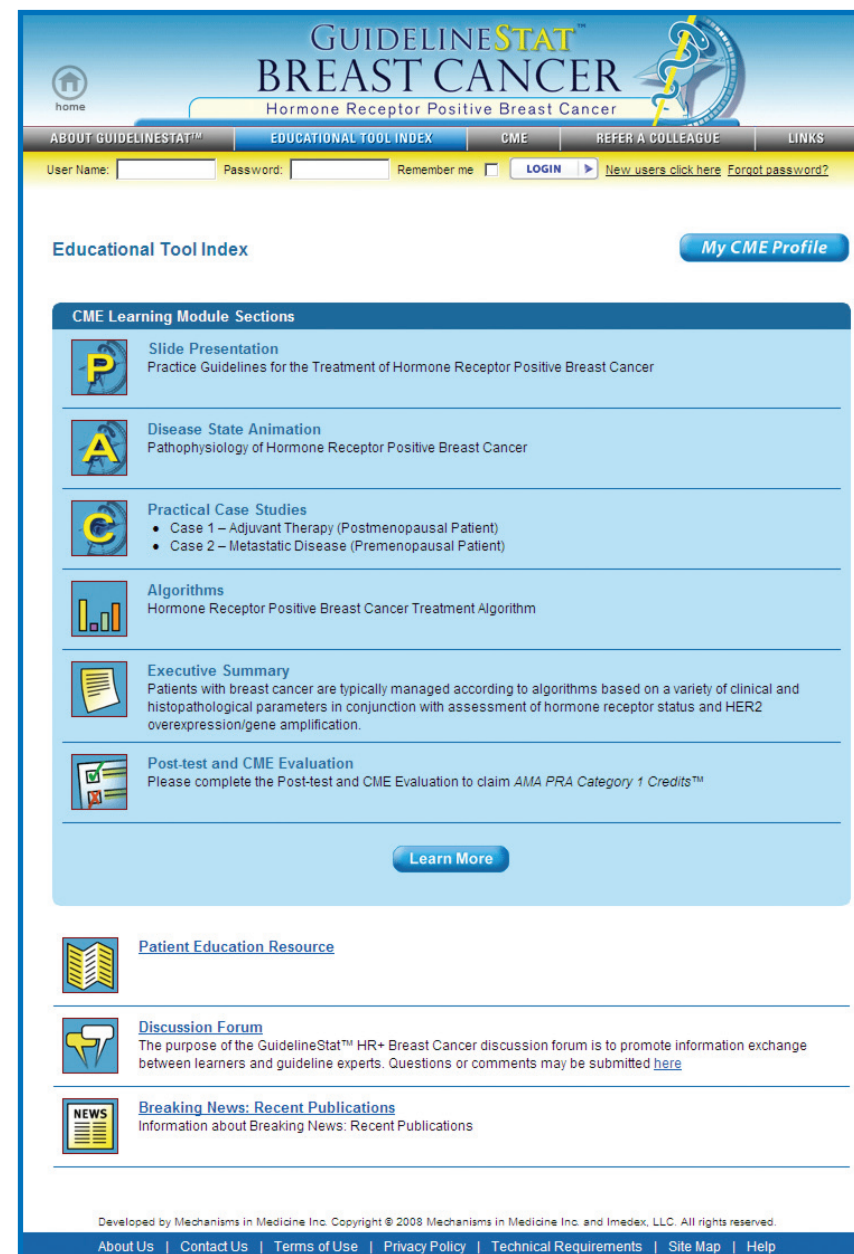

- An **Executive Summary** that addresses the practical, need-to-know information from the guideline, with information to access the full publication
- A **Slide Presentation**, suitable for self-directed learning and downloadable for teaching
- A **Disease State Animation** focused on the disease entity and its treatment
- **Practical Case Studies** exemplifying key teaching points and best-practice guideline recommendations
- **Treatment and Diagnostic Algorithms**, with interactive components
- **GuidelineStat™ Self-Evaluations** - Physician Self-Evaluation Post-test, for each learning module
- **Patient Education Resources** for in-office communications with patients
- A **Discussion Forum**, to promote information exchange between physician learners and guideline experts
- **Breaking News** related to the guideline

Content is peer-reviewed and developed in compliance with all ACCME, OIG, and related guidelines.

Guideline-based CME Modules Planned for 2009 Include:

Chronic Myelogenous Leukemia • HR Positive Breast Cancer • Diabetes Aspergillosis • Candidiasis • Community-Acquired Pneumonia • Crohn's Disease Ulcerative Colitis • Benign Prostatic Hyperplasia • Colon Cancer EGFR Positive Breast Cancer • Multiple Myeloma • Non-Small Cell Lung Cancer Rectal Cancer • Small Cell Lung Cancer • Triple Negative Breast Cancer • Stroke Chronic Obstructive Pulmonary Disease • Bipolar Disorder • Depression • Schizophrenia

Physician benefits from www.GuidelineStat.com:

• A convenient, succinct, online CME resource, responding to the time constraints of busy physicians in practice

• Credible content, developed in conjunction with a primary or leading author who contributed to the original published guideline

• A variety of learning formats that are highly suited to different learning preferences and styles

• Animations depicting the disease state of the guideline; excellent for teaching both students and patients

• In-depth case studies, emphasizing the key teaching points and best-practice guideline recommendations

• Self-evaluations for physician-learners to measure their knowledge against the guidelines

• Excellent for self-directed learning and teaching

• Certification: CME credits available
